To the Shareholder and Board of Directors of “Farm Credit Armenia” universal credit organization commercial cooperative:

We have audited the accompanying financial statements of “Farm Credit Armenia” universal credit organization commercial cooperative (the “Company”), which comprise the statement of financial position as of December 31, 2015, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

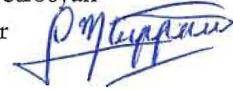

In our opinion, the financial statements give a true and fair view of the financial position of “Farm Credit Armenia” universal credit organization commercial cooperative as of December 31, 2015, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Other matter

The financial statements of “Farm Credit Armenia” universal credit organization commercial cooperative for the year ended December 31, 2014 were audited by another auditor, who expressed an unqualified opinion on those financial statements on April 28, 2015.

The accompanying notes on pages 7 to 39 are an integral part of these financial statements.

Accompanying notes to the financial statements

1 Principal activities

“Farm Credit Armenia” universal credit organization commercial cooperative (the “Company”) was founded in the Republic of Armenia in 2007 as a universal credit organization commercial cooperative and is regulated by the legislation of the Republic of Armenia (RA). The Company was registered on 18 September 2007 under license number 20, granted by the Central Bank of Armenia (the “CBA”).

The Company’s main activity is the extension of small and medium size agricultural loans to individuals and legal entities. The Company mainly extends loans and provides other financial services to farms in the regions of RA.

The head office of the Company is located in Yerevan, 7 branches are located in different regions of the RA. The legal address of the Company is Kajaznuni 18, Yerevan, RA.

2 Business environment

Armenia continues to undergo political and economic changes. As an emerging market, Armenia does not possess a developed business and regulatory infrastructure that generally exists in a more mature free market economy. In addition, economic conditions continue to limit the volume of activity in the financial markets, which may not be reflective of the values for financial instruments. The main obstacle to further economic development is a low level of economic and institutional development, along with a centralized economic base.

Deterioration of economic situation of countries collaborating with the RA led to the shortage of money transfers from abroad, upon which the economy of Armenia is significantly dependant. Further decline in international prices of mining products, uncertainties due to possibilities of attraction of direct capital investments, inflation, may lead to deterioration of the situation of Armenian economy and of the Company. However, as the number of variables and assumptions involved in these uncertainties is big, management cannot make a reliable estimate of the amounts by which the carrying amounts of assets and liabilities of the Company may be affected.

Management of the Company believes that in the current conditions appropriate measures are implemented in order to ensure economic stability of the Company.

3 Basis of preparation

3.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as developed and published by the International Accounting Standards Board (IASB), and Interpretations issued by the International Financial Reporting Interpretations Committee (“IFRIC”).

3.2 Basis of measurement

The financial statements have been prepared on a fair value basis for financial assets and liabilities at fair value through profit or loss and available for sale assets, except those for which a reliable measure of fair value is not available. Other financial assets and liabilities, as well as non-financial assets and liabilities are stated at amortised or historical cost.

3.3 Functional and presentation currency

Functional currency of the Company is the currency of the primary economic environment in which the Company operates. The Company’s functional currency and the Company’s presentation currency is Armenian Dram (“AMD”), since this currency best reflects the economic substance of the underlying events and transactions of the Company. The Company prepares statements for regulatory purposes in accordance with legislative requirements of the Republic of Armenia. These financial statements are based on the Company’s books and records as adjusted and reclassified in order to comply with IFRS. The financial statements are presented in thousands of AMD, which is not convertible outside Armenia.

3.4 Regroupings in the financial statements

With the aim to provide comparative information have been made regroupings of articles in the data of the previous year’s financial statements.

3.5 Changes in accounting policies

The Company applied for the first time certain standards and amendments, which are effective for annual periods beginning on or after 1 January 2015. The Company has not early adopted any other standard, interpretation or amendment that has been issued but is not yet effective. Although the new standards and amendments described below and applied for the first time in 2015 did not have a material impact on the annual consolidated financial statements of the Company.

- *Defined Benefit Plans: Employee Contributions (Amendments to IAS 19).*
- *Annual Improvements to IFRSs 2010–2012 Cycle.*
- *Annual Improvements to IFRSs 2011–2013 Cycle.*

3.6 Standards and Interpretations not yet applied by the Company

At the date of authorization of these financial statements, certain new standards, amendments and interpretations to the existing Standards have been published but are not yet effective. The Company has not early adopted any of these pronouncements.

Management anticipates that all of the pronouncements will be adopted in the Company’s accounting policy for the first period beginning after the effective date of the pronouncement.

Management does not anticipate a material impact on the Company’s financial statements from these Amendments, they are presented below.

IFRS 9 Financial Instruments (2014)

The IASB recently released *IFRS 9 Financial Instruments (2014)*, representing the completion of its project to replace *IAS 39 Financial Instruments: Recognition and Measurement*. The new standard introduces extensive changes to IAS 39’s guidance on the classification and measurement of financial assets and introduces a new ‘expected credit loss’ model for the impairment of financial assets. IFRS 9 also provides new guidance on the application of hedge accounting.

The Company’s management have yet to assess the impact of IFRS 9 on these financial statements. The new standard is required to be applied for annual reporting periods beginning on or after 1 January 2018.

The following new or amended standards are not expected to have a significant impact on the Company’s financial statements.

- *Clarification of Acceptable Methods of Depreciation and Amortisation (Amendments to LAS 16 and LAS 38).*
- *Annual Improvements to IFRSs 2012–2014 Cycle – various standards.*
- *Disclosure Initiative (Amendments to LAS 1).*

4 Summary of significant accounting policies

The following significant accounting policies have been applied in the preparation of the financial statements. The accounting policies have been consistently applied.

4.1 Recognition of income and expenses

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Expense is recognized to the extent that it is probable that the economic benefits will flow from the Company and the expense can be reliably measured. The following specific criteria must also be met before revenue is recognized:

Interest income and expense

Interest income and expense for all interest-bearing financial instruments, except for those classified as held for trading or designated at fair value through profit or loss, are recognised within ‘interest income’ and ‘interest expense’ in the statement of profit or loss and other comprehensive income using the effective interest method.

Once the recorded value of a financial asset or a group of similar financial assets has been reduced due to an impairment loss, interest income continues to be recognized using the original effective interest rate applied to the new carrying amount.

Fee and commission income and expense

Loan origination fees for loans issued to customers are deferred (together with related direct costs) and recognised as an adjustment to the effective yield of the loans. Fees, commissions and other income and expense items are generally recorded on an accrual basis when the service has been provided. Other service fees are recorded based on the applicable service contracts.

Net trading income

Net trading income comprises gains less losses related to trading assets and liabilities, and includes all realized and unrealized fair value changes, interest, dividends and foreign exchange differences related to trading assets and liabilities. Net trading income also includes gains less losses from trading in foreign currencies and is recognized in profit or loss when the corresponding service is provided.

4.2 Foreign currency

Transactions in foreign currencies are initially recorded in the functional currency rate ruling at the date of the transactions. Gains and losses resulting from the translation of trading assets are recognised in the statement of profit or loss and other comprehensive income in net trading income, while gains less losses resulting from translation of non-trading assets are recognized in the statement of income in other income or other expense. Monetary assets and liabilities denominated

in foreign currencies are retranslated at the functional currency rate of exchange ruling at the balance sheet date.

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortised cost are recognised in profit or loss, and other changes in the carrying amount are recognised in other comprehensive income.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on non-monetary items, such as equities held at fair value through profit or loss, are reported as part of the fair value gain or loss. Translation differences on non-monetary items, such as equities classified as available-for-sale financial assets, are included in the fair value reserve in equity.

Differences between the contractual exchange rate of a certain transaction and the prevailing average exchange rate on the date of the transaction are included in gains less losses from trading in foreign currencies in net trading income.

The exchange rates at year-end used by the Company in the preparation of the financial statements are as follows:

	December 31, 2015	December 31, 2014
AMD/1 US Dollar	483.75	474.97
AMD/1 EUR	528.69	577.47

4.3 Taxation

Income tax on the profit for the year comprises current and deferred tax. Income tax is recognised in the statement of profit or loss and other comprehensive income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantially enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years. In the case when financial statements are authorized for issue before appropriate tax returns are submitted, taxable profits or losses are based on estimates. Tax authorities might have more stringent position in interpreting tax legislation and in reviewing tax calculations. As a result tax authorities might claim additional taxes for those transactions, for which they did not claim previously. As a result significant additional taxes, fines and penalties could arise. Tax review can include 3 calendar years immediately preceding the year of a review. In certain circumstances tax review can include even more periods.

A deferred tax asset is recorded only to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilised. Deferred tax assets and liabilities are measured at tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantively enacted at the balance sheet date.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and joint ventures, except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The Republic of Armenia also has various operating taxes, which are assessed on the Company’s activities. These taxes are included as a component of other expenses in the statement of profit or loss and other comprehensive income.

4.4 Cash and cash equivalents

Cash and cash equivalents comprise amounts due from banks, which can be converted into cash at short notice, including highly liquid investments maturing within 90 days from the date of acquisition that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

Cash and cash equivalents are carried at amortized cost.

4.5 Financial instruments

The Company recognizes financial assets and liabilities on its statement of financial position when it becomes a party to the contractual obligation of the instrument. Regular way purchases and sales of financial assets and liabilities are recognised using settlement date accounting. Regular way purchases of financial instruments that will be subsequently measured at fair value between trade date and settlement date are accounted for in the same way as for acquired instruments.

When financial assets and liabilities are recognised initially, they are measured at historical value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs.

After initial recognition all financial liabilities, other than liabilities at fair value through profit or loss are measured at amortized cost using effective interest method. After initial recognition financial liabilities at fair value through profit or loss are measured at fair value.

The Company classified its financial assets into the following categories:

- financial instruments at fair value through profit or loss,
- held-to-maturity investments,
- loans and receivables.

The classification of investments between the categories is determined at acquisition based on the guidelines established by the management. The Company determines the classification of its financial assets after initial recognition and, where allowed and appropriate, re-evaluates this designation at each financial year-end.

Financial assets at fair value through profit or loss

This category has two subcategories: financial assets held for trading and those designated at fair value through profit or loss. A financial asset is classified in this category if acquired for the purpose of selling in the short-term or if so designated by management from the initial acquisition of that asset.

In the normal course of business, the Company enters into various derivative financial instruments including swaps in the foreign exchange and capital markets. Such financial instruments are held for trading and are initially recognised in accordance with the policy for initial recognition of financial instruments and are subsequently measured at fair value. The fair values are estimated based on quoted market prices or pricing models that take into account the current market and contractual prices of the underlying instruments and other factors. Derivatives are carried as assets when their fair value is positive and as liabilities when it is negative.

Financial assets and financial liabilities are designated at fair value through profit or loss when:

- Doing so significantly reduces measurement inconsistencies that would arise if the related derivatives were treated as held for trading and the underlying financial instruments were carried at amortised cost for such as loans and advances to customers or banks and debt securities in issue;
- Certain investments, such as equity investments, that are managed and evaluated on a fair value basis in accordance with a documented risk management or investment strategy and reported to key management personnel on that basis are designated at fair value through profit and loss; and
- Financial instruments, such as debt securities held, containing one or more embedded derivatives significantly modify the cash flows, are designated at fair value through profit and loss.

Derivatives are also classified as held for trading unless they are designated as effective hedging instruments. Gains or losses on financial assets held for trading are recognised in the statement of profit or loss and other comprehensive income.

Held-to-maturity investments

Held-to-maturity investments are financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. Were the Company to sell other than insignificant amount of held-to-maturity assets not close to their maturity, the entire category would be reclassified as available-for-sale. Held-to-maturity investments are carried at amortized cost using the effective interest rate method, less any allowance for impairment.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments, which arise when the Company provides money directly to a debtor with no intention of trading the receivable.

Loans granted by the Company with fixed maturities are initially recognized at fair value plus related transaction costs. Where the fair value of consideration given does not equal the fair value of the loan, for example where the loan is issued at lower than market rates, the difference between the fair value of consideration given and the fair value of the loan is recognized as a loss on initial recognition of the loan and included in the statement of profit or loss and other comprehensive income as losses on origination of assets. Subsequently, the loan carrying value is measured using the effective interest method. Loans to customers that do not have fixed maturities are accounted for under the effective interest method based on expected maturity. Loans to customers are carried net of any allowance for impairment losses.

4.6 Impairment of financial assets

The Company assesses at each balance sheet date whether a financial asset or group of financial assets is impaired.

Assets carried at amortised cost

A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (“loss event”) and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Criteria used to determine that there is objective evidence of an impairment loss may include indications that the borrower or a group of borrowers is experiencing significant financial difficulty (for example, equity ratio, net income percentage of sales), default or delinquency in interest or principal payments, breach of loan covenants or conditions, deterioration in the value of collateral, the probability that they will enter bankruptcy or other financial reorganization and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

The Company first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

If there is objective evidence that an impairment loss on financial assets carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset’s original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced through use of an allowance account. The amount of the loss shall be recognised in the statement of profit or loss and other comprehensive income. If a loan or held-to-maturity investment has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. The Company may measure impairment on the basis of an instrument’s fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not the foreclosure is probable.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of the Company’s internal credit grading system that considers credit risk characteristics such as asset type, industry, geographical location, collateral type, past-due status and other relevant factors.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the group and historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss

experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist.

Estimates of changes in future cash flows for groups of assets should reflect and be directionally consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses in the group and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Company to reduce any differences between loss estimates and actual loss experience.

Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Company. If, in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If future write-off is later recovered, the recovery is credited to the allowance account.

Renegotiated loans

Where possible, the Company seeks to restructure loans rather than to take possession of collateral. This may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, the loan is no longer considered past due. Management continuously reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan’s original effective interest rate.

4.7 Derecognition of financial assets and liabilities

Financial assets

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised where:

- the rights to receive cash flows from the asset have expired;
- the Company has transferred its rights to receive cash flows from the asset, or retained the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a ‘pass-through’ arrangement; and
- the Company either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Company has transferred its rights to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company’s continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of the Company’s continuing involvement is the amount of the transferred asset that the Company may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision)

on an asset measured at fair value, the extent of the Company’s continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognised in the statement of profit or loss and other comprehensive income.

4.8 Leases

Finance – Company as lessor

The Company recognises lease receivables at value equal to the net investment in the lease, starting from the date of commencement of the lease term. The arrangement is presented within loans and advances. Finance income is based on a pattern reflecting a constant periodic rate of return on the net investment outstanding. Initial direct costs are included in the initial measurement of the lease receivables.

Operating - Company as lessee

Leases of assets under which the risks and rewards of ownership are effectively retained by the lessor are classified as operating leases. Lease payments under an operating lease are recognised as expenses on a straight-line basis over the lease term and included in other operating expenses.

4.9 Property, plant and equipment

Property, plant and equipment (“PPE”) are recorded at historical cost less accumulated depreciation. If the recoverable value of PPE is lower than its carrying amount, due to circumstances not considered to be temporary, the respective asset is written down to its recoverable value.

Depreciation is calculated using the straight-line method based on the estimated useful life of the asset. The following depreciation rates have been applied:

	Useful life (years)
Computers and other communication means	1-5
Household equipment	5
Transportation	5

Leasehold improvements are capitalized and depreciated over the shorter of the lease term and their useful lives on a straight-line basis. Assets under the course of construction are accounted based on actual expenditures less any impairment losses. Upon completion of construction assets are transferred to property plant and equipment and accounted at their carrying amounts. Assets under the course of construction are not depreciated until they are ready for usage.

Repairs and maintenance are charged to the statement of profit or loss and other comprehensive income during the period in which they are incurred. The cost of major renovations is included in the carrying amount of the asset when it is incurred and when it satisfies the criteria for asset recognition. Major renovations are depreciated over the remaining useful life of the related asset.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in operating profit.

4.10 Intangible assets

Intangible assets include computer software, licences and other.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are amortised on a straight-line basis over the useful economic lives of 10 years and assessed for impairment whenever there is an indication that the intangible asset may be impaired. Amortisation periods and methods for intangible assets with finite useful lives are reviewed at least at each financial year-end.

Intangible assets with indefinite useful lives are not amortised, but tested for impairment annually either individually or at the cash-generating unit level. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable.

Costs associated with maintaining computer software programmes are recorded as an expense as incurred. Software development costs (relating to the design and testing of new or substantially improved software) are recognised as intangible assets only when the Company can demonstrate the technical feasibility of completing the software so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete and the ability to measure reliably the expenditure during the development. Other software development costs are recognised as an expense as incurred.

4.11 Grants

Grants are initially recognised as deferred income at fair value, when there is a reasonable assurance that grants will be received and the Company will satisfy the conditions associated with grants, later they are recognised in profit or loss as income during useful life of asset. Grants that compensate the costs incurred by the Company are recognised in profit or loss at the same period when expenses are recognised.

4.12 Loans and borrowings

Loans and borrowings which include borrowings received from the CBA and other organizations are initially recognised at the fair value of the consideration received less directly attributable transaction costs. After initial recognition, borrowings are subsequently measured at amortised cost using the effective interest method. Gains and losses are recognised in the statement of profit or loss and other comprehensive income when the liabilities are derecognised as well as through the amortisation process.

4.13 Charter capital

Charter capital

Charter capital consists of shareholders' shares.

Retained earnings

Include retained earnings of current and previous periods.

Dividends

Dividends are recognised as a liability and deducted from equity at the balance sheet date only if they are declared before or on the balance sheet date. Dividends are disclosed when they are proposed before the balance sheet date or proposed or declared after the balance sheet date but before the financial statements are authorised for issue.

4.14 Offsetting

Financial assets and liabilities, and income and expenses, are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted under IFRS, or for gains and losses arising from a group of similar transactions such as in the Company’s trading activity.

5 Critical accounting estimates and judgements

The preparation of financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the application of policies and the reported amounts of assets and liabilities, income and expense. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Although these estimates are based on management’s best knowledge of current events and actions, actual results ultimately may differ from these estimates.

The most significant areas of judgements and estimates with regards to these financial statements are presented below:

Measurement of fair values

Management uses valuation techniques to determine the fair value of financial instruments (where active market quotes are not available) and non-financial assets. This involves developing estimates and assumptions consistent with how market participants would price the instrument. Management bases its assumptions on observable data as far as possible but this is not always available. In that case management uses the best information available. Estimated fair values may vary from the actual prices that would be achieved in an arm’s length transaction at the reporting date (see Note 26).

Related party transactions

In the normal course of business the Company enters into transactions with its related parties. Judgement is applied in determining if transactions are priced at market or non-market interest rates, where there is no active market for such transactions. The basis for judgement is pricing for similar types of transactions with unrelated parties and effective interest rate analysis(see Note 25).

Allowance for impairment of loans and receivables

The Company reviews its problem loans and advances at each reporting date to assess whether an allowance for impairment should be recorded in the statement of profit or loss and other comprehensive income. In particular, judgement by management is required in the estimation of the amount and timing of future cash flows when determining the level of allowance required. Such estimates are based on assumptions about a number of factors and actual results may differ, resulting in future changes to the allowance.

In addition to specific allowances against individually significant loans and advances, the Company also makes a collective impairment allowance against exposures which, although not specifically identified as requiring a specific allowance, have a greater risk of default than when originally granted. This take into consideration factors such as any deterioration in country risk, industry, and technological obsolescence, as well as identified structural weaknesses or deterioration in cash flows.

Fair value of derivatives

The fair values of financial derivatives that are not quoted in active markets are determined by using valuation techniques. Valuation of financial derivatives is applied to single currency interest rate swap transactions, cross currency interest swap transactions and foreign exchange forward contracts. The fair value of these transactions is determined as the difference between the present value of fixed receivable and the present value of floating obligation or vice versa. The present value of floating obligation is determined using discount factors derived from the zero coupon curve. Where valuation techniques (for example, models) are used to determine fair values, they are validated and periodically reviewed by qualified personnel independent of the area that created them. To the extent practical, models use only observable data, however areas such as credit risk (both own and counterparty), volatilities and correlations require Management to make estimates. Changes in assumptions about these factors could affect reported fair values. Any over or under estimation of these future cash flows could require a material adjustment to the carrying value of these derivatives.

Useful Life of PPE

Useful life evaluation of PPE is the result of judgement, based on the experience with similar assets. Future economic benefits are embodied in assets and mainly consumed along with usage. However, such factors as operational, technical or commercial depreciation often lead to decrease of asset's economic benefit. Management evaluates the remaining useful life according to the asset's current technical condition and estimated period, during which the Company expects to receive benefits. For the evaluation of remaining useful life are considered the following main factors: expectable usage of assets, depending on the operational factors and maintenance program, that is depreciation and technical and commercial depreciation arising from the changes in the market conditions.

Tax legislation

Armenian tax legislation is subject to varying interpretations. Refer to Note 24.

6 Interest and similar income and expense

In thousand Armenian drams	2015	2014
Cash and cash equivalents	17,329	7,677

Professional services	3,600	8,360
Other expenses	6,432	4,458
Total other expense	223,623	207,819

13 Income tax expense

In thousand Armenian drams	2015	2014
Current tax	5,427	20,475
Deferred tax expense/(reversal)	9,207	(9,626)
Total income tax expense	14,634	10,849

The corporate income tax within the Republic of Armenia is levied at the rate of 20% (2014: 20%). Differences between IFRS and RA statutory tax regulations give rise to certain temporary differences between the carrying value of certain assets and liabilities for financial reporting purposes and for profit tax purposes. Deferred income tax is calculated using the principal tax rate of 20%.

Numerical reconciliation between the tax expenses and accounting profit is provided below:

In thousand Armenian drams	2015	Effective rate (%)	2014	Effective rate (%)
Profit before tax	70,932		178,316	
Income tax at the rate of 20%	14,186	20	35,663	20
Foreign exchange net gains from non-trading financial assets and liabilities	(3,837)	(5)	(27,086)	(15)
Non-deductible expenses	4,285	6	2,272	1
Total income tax expense	14,634	21	10,849	6

Deferred tax calculation in respect of temporary differences:

In thousand Armenian drams	As of December 31, 2014	Recognized in profit or loss	As of December 31, 2015

14 Cash and cash equivalents

In thousand Armenian drams	As of December 31, 2015	As of December 31, 2014
Correspondent accounts with banks	190,615	473,994
Deposits for less than 90 days	300,148	330,136
Total cash and cash equivalents	490,763	804,130

As of 31 December 2015 average weighted effective interest rate of deposits for less than 90 is 11.8% (2014: 14.9%).

15 Derivative financial instruments

The Company uses the following derivative instruments. Currency and interest rate swaps are commitments to exchange one set of cash flows for another. Swaps result in an economic exchange of currencies. The Company’s credit risk represents the potential cost to replace the swap contracts if counterparties fail to fulfil their obligation. The aggregate contractual or notional amount of derivative financial instruments on hand, the extent to which instruments are favourable or

unfavourable, and thus the aggregate fair values of derivative financial assets and liabilities, can fluctuate significantly from time to time.

Fair values of derivative financial instruments are presented below:

In thousand Armenian drams	As of December 31, 2015		
	Notional amount	Fair value of assets	Fair value of liabilities
Foreign exchange contracts			
Swap contracts	309,600	392	799
Total derivative financial instruments		392	799

16 Loans to customers

In thousand Armenian drams	As of December 31, 2015	As of December 31, 2014
Privately held companies	783,538	629,596
Sole proprietors	1,644,212	1,509,316
Individuals	5,508,319	5,189,585
	7,936,069	7,328,497
Impairment reserves on loans	(200,625)	(151,744)
Total loans to customers	7,735,444	7,176,753

As of 31 December 2015 accrued interest included in loans to customers amounted to AMD 87,630 thousand (2014: AMD 76,615 thousand).

As of 31 December 2015 the average weighted effective interest rate on loans and borrowings to customers was 14.81% (2014: 16.16%) for loans in AMD and 13.31% (2014: 13.63%) for loans in USD.

As of 31 December 2015 the Company did not have borrowers or groups related to borrowers (2014: nil) whose credit balances exceed 10% of total equity.

Analysis of extended loans by economy sectors is as follows:

In thousand Armenian drams	As of December 31, 2015						
	Crop production	Cattle breeding	Trading	Fish farming	Manufacturing	Other	Total
Loans	2,902,735	2,552,909	1,365,527	235,520	461,513	417,865	7,936,069
Impairment reserves on loans	(71,161)	(65,693)	(35,268)	(3,537)	(18,691)	(6,275)	(200,625)
Net loans	2,831,574	2,487,216	1,330,259	231,983	442,822	411,590	7,735,444

							As of December 31, 2014

Loans	2,804,166	2,220,409	1,313,920	221,465	456,947	311,590	7,328,497
Impairment reserves on loans	(60,503)	(34,596)	(42,332)	(3,455)	(6,854)	(4,004)	(151,744)
Net loans	2,743,663	2,185,813	1,271,588	218,010	450,093	307,586	7,176,753

Reconciliation of allowance account for losses on loans and advances by class is as follows:

							As of December 31, 2015
In thousand Armenian drams	Crop production	Cattle breeding	Trading	Fish farming	Manufacturing	Other	Total
At 1 January 2015	60,503	34,596	42,332	3,455	6,854	4,004	151,744
Charge for the year	24,838	30,066	29,803	82	44,619	3,152	132,560
Amounts (written off)/recovery	(14,180)	1,031	(36,867)	-	(32,782)	(881)	(83,679)
At 31 December 2015	71,161	65,693	35,268	3,537	18,691	6,275	200,625
Individual impairment	28,888	28,447	16,004	-	6,479	-	79,818
Collective impairment	42,273	37,246	19,264	3,537	12,212	6,275	120,807
	<u>71,161</u>	<u>65,693</u>	<u>35,268</u>	<u>3,537</u>	<u>18,691</u>	<u>6,275</u>	<u>200,625</u>
Gross amount of loans individually determined to be impaired, before deducting any individually assessed impairment allowance	87,842	72,811	82,851	-	25,310	-	268,814

							As of December 31, 2014
In thousand Armenian drams	Crop production	Cattle breeding	Trading	Fish farming	Manufacturing	Other	Total
At 1 January 2014	34,312	25,068	13,976	4,430	5,375	2,038	85,199
Charge for the year/(recovery)	38,273	19,574	34,883	10,405	(89)	1,966	105,012
Amounts (written off)/recovery	(12,082)	(10,046)	(6,527)	(11,380)	1,568	-	(38,467)
At 31 December 2014	60,503	34,596	42,332	3,455	6,854	4,004	151,744
Individual impairment	31,743	3,400	23,071	-	-	-	58,214
Collective impairment	28,760	31,196	19,261	3,455	6,854	4,004	93,530
	<u>60,503</u>	<u>34,596</u>	<u>42,332</u>	<u>3,455</u>	<u>6,854</u>	<u>4,004</u>	<u>151,744</u>
Gross amount of loans individually determined to be impaired, before deducting any individually assessed impairment allowance	33,191	3,554	32,835	-	-	-	69,580

As it is mentioned in Note 26 at 31 December 2015 and 31 December 2014 the estimated fair value of loans to customers approximates their carrying value.

The risks inherent in the loan portfolio are disclosed in Note 29. The information on related party balances is disclosed in Note 25.

Maturity analysis of loans and advances to customers are disclosed in Note 28.

17 Financial lease receivables

Information on financial lease is presented below:

In thousand Armenian drams	As of December 31, 2015	As of December 31, 2014
Gross investment in finance leases		
Not later than 1 year	32,675	40,776
Later than 1 year and not later than 5 years	47,074	80,693
	<u>79,749</u>	<u>121,469</u>
Unearned future finance income on finance leases		
Not later than 1 year	(1,892)	(2,451)
Later than 1 year and not later than 5 years	(9,765)	(17,693)
	<u>(11,657)</u>	<u>(20,144)</u>
Net investment in finance leases	68,092	101,325
Impairment charge on finance lease	(2,568)	(4,110)
Financial lease receivables	65,524	97,215

The movement in allowance for impairment losses on financial lease is as follows:

In thousand Armenian drams	Total
At 1 January 2014	5,552
Reversal for the year	(1,442)
At 31 December 2014	4,110
Charge for the year	6,618
Amounts written off	(8,160)
At 31 December 2015	2,568
Collective impairment	2,568

As of 31 December 2015 supposed interest rate in respect of financial lease is 17.1% (2014: 16.4%).

Maturity analysis of amounts to customers in respect of financial lease is disclosed in Note 28.

Loans from international financial institutions	122,363	729,616
Total loans and borrowings	7,008,565	6,862,054

Loans from the Central Bank of the Republic of Armenia include loans received from the KfW bank in the scope of “RA agricultural sector support program”, amounts received from the Asian Development Bank in the scope of “Women’s entrepreneurship support sector development program”, as well as loans received from the European Bank for Reconstruction and Development in the scope of “SME’s access to finance program”.

As of 31 December 2015 loans to customers in amount of AMD 5,724,567 thousand (2014: AMD 4,606,800 thousand) serve as guarantee for borrowings from the CBA.

Borrowings received from RA non-commercial organizations include borrowings from International Financial Program Management Centre (previous Millennium Challenge Fund – Armenian program), Rural Finance Facility-Project Implementation Unit state institution and Small and Medium Entrepreneurship Development National Centre of Armenia.

The aim of borrowings is the extension of loans to agricultural sector for which is pledged the total amount of loans extended to sub-borrowers by the Company. As of 31 December 2015 the total amount of these loans was AMD 653,302 thousand (2014: AMD 1,264,600 thousand).

In loans from financial institutions are included borrowings received from “Symbiotics SA”.

As of 31 December 2015 the weighted average effective interest rate on amounts due to financial institutions is 8.08% for loans in AMD (2014: 8.03%) and 5.17% for loans in USD (2014: 6.22%).

The Company did not have any defaults of principal, interest or other breaches with respect to its liabilities during the period (2014: nil).

21 Grants related to assets

In thousand Armenian drams	2015	2014
As of 1 January	108,554	41,322
Increase	-	93,388
Income recognition	(27,650)	(26,154)
Balance as of 31 December	80,904	108,556

22 Other liabilities

In thousand Armenian drams	As of December 31, 2015	As of December 31, 2014
Liabilities towards members on replenishment the charter capital	30,227	23,460
Due to suppliers	4,793	10,363
Due to personnel	8,019	8,136
Other financial liabilities	2,974	5,652
Total other liabilities	46,013	47,611

Liabilities towards members on replenishment the charter capital represent amounts received from present and possible future members for equity contribution. These amounts are subject to approval by the shareholders during the meeting.

23 Equity

As of 31 December 2015 the Company’s registered and paid-in charter capital was AMD 699,794 thousand. The Company has 4,502 shareholders (2014: 3,485 shareholders).

As of 31 December 2015 and 2014, the Company did not possess any of its own shares.

During shareholders meeting in 2015 the Company has not declared dividends.

24 Contingent liabilities and commitments

Tax and legal matters

The taxation system in Armenia is relatively new and is characterised by frequent changes in legislation, official pronouncements and court decisions, which are sometimes unclear, contradictory and subject to varying interpretation. Taxes are subject to review and investigation by tax authorities, which have the authority to impose fines and penalties. In the event of a breach of tax legislation, no liabilities for additional taxes, fines or penalties may be imposed by tax authorities once three years have elapsed from the date of the breach.

These circumstances may create tax risks in Armenia that are more significant than in other countries. Management believes that it has provided adequately for tax liabilities based on its interpretations of applicable Armenian tax legislation, official pronouncements and court decisions. However, the interpretations of the relevant authorities could differ and the effect on these financial statements, if the management were successful in enforcing their interpretations, could be significant.

Management believes that the Company has complied with all regulations and has completely settled all its tax liabilities.

As at 31 December 2015 there were no legal actions and complaints taken against the Company. Therefore, the Company has not made any respective provision related to such tax and legal matters.

Loan commitment, guarantee and other financial facilities

In the normal course of business, the Company has not provided financial instruments with off-balance sheet.

As of 31 December 2015 the Company did not have contingent liabilities.

Operating lease commitments – Company as a lessee

In the normal course of business the Company enters into commercial lease agreements for the building and office area.

The future aggregate minimum lease payments under operating leases are as follows:

In thousand Armenian drams	As of December 31, 2015	As of December 31, 2014
Not later than 1 year	45,880	45,880
Later than 1 year and not later than 5 years	135,365	163,878
Later than 5 years	3,753	21,145
Total operating lease commitments	184,998	230,903

25 Transactions with related parties

In accordance with IAS 24 *Related Party Disclosures*, parties are considered to be related if one party has ability to control the other party or exercise significant influence over the other party in making financial or operational decisions. For the purpose of the present financial statements, related parties include shareholders, members of Company’s Management as well as other persons and enterprises related with and controlled by them respectively.

The Company does not have ultimate controlling party.

A number of organizational transactions are entered into with related parties in the normal course of business. Those transactions include loans and etc.

The volumes of related party transactions, outstanding balances at the year end, and related expense and income for the year are as follows:

In thousand Armenian drams	2015	2014
	Key management personnel and related parties	Key management personnel and related parties
Statement of financial position		
Loans to customers		
Contractual balance of loans at January 1	115,158	93,928
Extended during the year	88,631	114,958
Repaid during the year	(68,327)	(93,728)
Balance sheet amount of loans at December 31	135,462	115,158
Less allowance for loan impairment	(2,032)	(1,727)
Loans outstanding at December 31	133,430	113,431

In thousand Armenian drams	2015	2014
	Key management personnel and related parties	Key management personnel and related parties
Statement of profit or loss and other comprehensive income		
Interest income on loans	12,007	9,407
Impairment charge	(305)	(1,027)

Loans extended to related parties are subject to repayment till 2023 and their contractual interest rate is 5-17% (2014: 5-17%).

Compensation of key management personnel was comprised of the following:

In thousand Armenian drams	2015	2014
Salaries and other short-term benefits	134,267	136,720
Total key management compensation	134,267	136,720

26 Fair value measurement

Financial and non-financial assets and liabilities measured at fair value in the statement of financial position are presented below. This hierarchy groups financial and non-financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset and liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices)
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

26.1 Financial instruments that are not measured at fair value

The table below presents the fair value of financial assets and liabilities not measured at their fair value in the statement of financial position and analyses them by the level in the fair value hierarchy into which each fair value measurement is categorised.

In thousand Armenian drams	As of 31 December 2015				
	Level 1	Level 2	Level 3	Total fair values	Total carrying amount
FINANCIAL ASSETS					
Cash and cash equivalents	-	490,763	-	490,763	490,763
Loans to customers	-	7,735,444	-	7,735,444	7,735,444
Financial lease receivables	-	65,524	-	65,524	65,524
Other assets	-	746	-	746	746
FINANCIAL LIABILITIES					
Loans and borrowings	-	7,008,565	-	7,008,565	7,008,565
Other liabilities	-	46,013	-	46,013	46,013

In thousand Armenian drams	As of 31 December 2014				
	Level 1	Level 2	Level 3	Total fair values	Total carrying amount
FINANCIAL ASSETS					
Cash and cash equivalents	-	804,130	-	804,130	804,130
Loans to customers	-	7,176,753	-	7,176,753	7,176,753
Financial lease receivables	-	97,215	-	97,215	97,215
FINANCIAL LIABILITIES					
Loans and borrowings	-	6,862,054	-	6,862,054	6,862,054
Other liabilities	-	47,611	-	47,611	47,611

Cash and cash equivalents

For assets and liabilities maturing within one month, the carrying amount approximates fair value due to the relatively short-term maturity of these financial instruments. For the assets and liabilities maturing in over one month, the fair value was estimated as the present value of estimated future cash flows discounted at the appropriate year-end market rates, which are mainly the same as current interest rates.

Loans and advances to customers

The estimated fair value of fixed interest rate instruments is based on estimated future cash flows expected to be received discounted at current interest rates for new instruments with similar credit risk and remaining maturity.

The fair value of the impaired loans is calculated based on expected cash flows from the sale of collateral. The value of collateral is based on appraisals performed by independent, professionally-qualified property valuers.

Loans and borrowings

The fair value of these liabilities is estimated by using the discounted cash flow techniques, applying the rates that are offered for instruments of similar maturities and terms.

26.2 Financial instruments that are measured at fair value

In thousand Armenian drams	As of 31 December 2015			
	Level 1	Level 2	Level 3	Total
FINANCIAL ASSETS				
Derivative financial assets	-	392	-	392
Total	-	392	-	392
FINANCIAL LIABILITIES				
Derivative financial liabilities	-	799	-	799
Total	-	799	-	799
NET FAIR VALUE	-	(407)	-	(407)

The methods and valuation techniques used for the purpose of measuring fair value are unchanged compared to the previous reporting period.

27 Offsetting of financial assets and financial liabilities

In the ordinary course of business, the Company performs different operations with financial instruments which may be presented in net amounts when there is a legally enforceable right to set

off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

As of December 31, 2015 and 2014 the Company does not have financial assets and financial liabilities in the statement of financial position which are presented in net amount or will be offset due to presence of the master netting arrangements or similar agreements.

28 Maturity analysis of financial assets and liabilities

The table below shows an analysis of financial assets and liabilities analysed according to when they are expected to be recovered or settled. See Note 29.3 for the Company’s contractual undiscounted repayment obligations.

29 Risk management

The Company’s activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The Company’s aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Company’s financial performance.

The aim of the Company’s risk management policy is to identify and analyse risks and manage them efficiently. The Company periodically revises risk management policy and systems to reflect in the market and follow the best practice.

Risk management is performed by the Management of the Company according to the lending policy and internal regulation approved by the Board of the Company. The Management identifies, assesses and undertakes measures for mitigating financial risks.

Risk management structure

The Board of Directors is ultimately responsible for identifying and controlling risks; however, there are separate independent bodies responsible for managing and monitoring risks.

Board of the Company

The Board is responsible for the overall risk management approach and for approving the risk strategies and principles.

Executive Director

Executive Director has the responsibility to monitor the overall risk process within the Company, is responsible for the management of the Company’s assets and liabilities. Also is responsible for the Company’s liquidity risk and for the financial risk management.

Credit Committee

The Credit Committee is responsible for the general risk management in the lending process.

Internal Audit

Risk management processes throughout the Company are audited by the Internal auditor, that examines both the adequacy of the procedures and the Company’s compliance with the procedures. Internal auditor discusses the results of all assessments with management, and reports its findings and recommendations to the Board.

Monitoring and controlling risks is primarily performed based on the Company’s business strategy and market environment, as well as the level of risk that the Company is willing to accept, with additional emphasis on selected industries.

Excessive risk concentration

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographic region, or have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Company’s performance to developments affecting a particular industry or geographical location.

In order to avoid excessive concentrations of risks, the Company’s policies and procedures include specific guidelines to focus on maintaining a diversified portfolio.

The most important risks are credit risk, liquidity risk, market risk and other operating risk. Market risk includes interest rate risk, currency risk and other price risks.

29.1 Credit risk

The Company takes on exposure to credit risk, which is the risk that a counterparty will cause a financial loss for the Company by failing to discharge an obligation. Credit risk is the most important risk for the Company’s business; management therefore carefully manages its exposure to credit risk. Credit exposures arise principally in lending activities that lead to loans and advances, and investment activities that bring debt securities and other bills into the Company’s asset portfolio. The credit risk management and control are centralised in credit risk management team of Company and reported to the Company’s management regularly.

The carrying amounts of the Company’s financial assets best represent the maximum exposure to credit risk related to them, without taking account of any collateral held or other credit enhancements.

29.1.1 Risk concentrations of the maximum exposure to credit risk

Geographical sectors

As of 31 December 2015 and 2014 the Company’s credit risks are entirely centralised in the RA.

Industry sectors

The following table breaks down the Company’s main credit exposure at their carrying amounts, as categorized by the spheres of activity of the counterparties as of 31 December.

In thousand Armenian drams	Financial institutions	Crop production	Cattle breeding	Trading	Fish farming	Manufac- turing	Other	Total
Cash and cash equivalents	490,763	-	-	-	-	-	-	490,763
Derivative financial assets	392	-	-	-	-	-	-	392
Loans to customers	-	2,831,574	2,487,216	1,330,259	231,983	442,822	411,590	7,735,444
Financial lease receivables	-	61,846	1,032	-	-	2,646	-	65,524
Other assets	-	-	-	-	-	-	746	746
As at 31 December 2015	491,155	2,893,420	2,488,248	1,330,259	231,983	445,468	412,336	8,292,869
As at 31 December 2014	804,130	2,834,813	2,187,514	1,271,589	218,010	454,455	307,587	8,078,098

29.1.2 Risk limit control and mitigation policies

With the aim to mitigate its credit risk the Company may define maximum limits on loan extension for the entities cooperating with him. Separate limit may be defined for each entity.

Some other specific control and mitigation measures are outlined below.

Collateral

The Company employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advances, which is common practice. The Company implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans are:

- Real estate pledged,

- Operating assets of the companies
- Movable property: trucks and cars, agricultural mechanisms, equipment,

In order to minimise the credit loss the Company requires additional collateral and guarantees from the borrower.

The analysis of loan portfolio (gross) by collateral is represented as follows:

In thousand Armenian drams	As of December 31, 2015	As of December 31, 2014
Loans collateralized by real estate	5,018,551	4,867,802
Movable property and other PPE	807,328	605,418
Guarantees	2,022,448	1,538,048
Unsecured loans	87,742	317,229
Total loans and advances (gross)	7,936,069	7,328,497

The amounts presented in the table above are carrying values of the loans, and do not necessarily represent the fair value of the collaterals. Estimates of market values of collaterals are based on valuation of the collateral at the date when loans were provided. Generally they are not updated unless loans are assessed as individually impaired.

29.1.3 Impairment and provisioning policies

The main considerations for the loan impairment assessment include whether any payments of principal or interest are overdue or there are any known difficulties in the cash flows of counterparties, credit rating downgrades, or infringement of the original terms of the contract. The Company addresses impairment assessment into areas: individually assessed allowances and collectively assessed allowances.

Individually assessed allowances

The Company determines the allowances appropriate for each individually significant loan or advance on an individual basis. Items considered when determining allowance amounts include the sustainability of the counterparty's business plan, its ability to improve performance once a financial difficulty has arisen, projected receipts and the expected dividend payout should bankruptcy ensue, the availability of other financial support and the realizable value of collateral, and the timing of the expected cash flows. The impairment losses are evaluated at each reporting date, unless unforeseen circumstances require more careful attention.

Collectively assessed allowances

Allowances are assessed collectively for losses on loans and advances that are not significant and for individually significant loans and advances where there is not yet objective evidence of individual impairment. Allowances are evaluated on each reporting date with each portfolio receiving a separate review.

The collective assessment takes account of impairment that is likely to be present in the portfolio even though there is not yet objective evidence of the impairment in an individual assessment. Impairment losses are estimated by taking into consideration of the following information: historical losses on the portfolio, current economic conditions, the approximate delay between the time a loss

is likely to have been incurred and the time it will be identified as requiring an individually assessed impairment allowance, and expected receipts and recoveries once impaired.

Financial guarantees and letters of credit are assessed and provision made in a similar manner as for loans.

Loans and advances neither past due or impaired

The table below shows the credit quality by class of asset for loans and advances neither past due or impaired, based on the historical counterparty default rates.

In thousand Armenian drams	As of December 31, 2015	As of December 31, 2014
Loans and advances to customers		
Crop production	0.79%	0.91%
Cattle breeding	0.16%	0.14%
Trading	0.94%	0.13%
Fish farming	1.48%	2.23%
Manufacturing	2.80%	0.80%
Other	1.06%	2.07%

As of 31 December 2015 and 31 December 2014 the Company has not had any losses on other financial assets bearing credit risk.

Past due but not impaired loans

Past due loans and advances include those that are only past due by a few days. The majority of the past due loans are not considered to be impaired.

Analysis of past due loans by class is provided below.

In thousand Armenian drams	As of December 31, 2015

Total	38,438	19,215	8,957	8,395	75,005

29.2 Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates and foreign exchange rates. The Company classifies exposures to market risk into either trading or non-trading portfolios. As of 31 December, 2015 and 2014 the Company does not hold trading portfolio. Non-trading positions are managed and monitored using other sensitivity analyses. Except for the concentrations within foreign currency, as of 31 December, 2015 and 2014 the Company has no significant concentration of market risk.

29.2.1 Market risk – Non-trading

Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments. At 31 December 2015 and 2014 the Company does not hold floating rate financial assets or liabilities.

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates.

The tables below indicate the currencies to which the Company had significant exposure at 31 December 2015 on its non-trading monetary assets and liabilities and its forecast cash flows. The analysis calculated the effect of a reasonably possible movement of the currency rate against the Armenian dram, with all other variables held constant on the income statement (due to the fair value of currency sensitive non-trading monetary assets and liabilities) and equity (due to the change in fair value of currency swaps and forward foreign exchange contracts used as cash flow hedges, and equity instruments). A negative amount in the table reflects a potential net reduction in income statement or equity, while a positive amount reflects a net potential increase.

In thousand Armenian drams	2015			2014		
	Change in currency rate in %	Effect on profit before tax	Effect on equity	Change in currency rate in %	Effect on profit before tax	Effect on equity
Currency						
USD	5	56,220	56,220	5	46,865	46,865
USD	(5)	(56,220)	(56,220)	(5)	(46,865)	(46,865)

The Company’s exposure to foreign currency exchange risk is as follow:

In thousand Armenian drams

	Armenian Dram	Freely convertible currencies/ precious metals	Total

Freely convertible currencies represent mainly US dollar amounts.

29.3 Liquidity risk

Liquidity risk is the risk that the Company will be unable to meet its payment obligations when they fall due under normal and stress circumstances. To limit this risk, management manages assets with liquidity in mind, and monitors future cash flows and liquidity on a daily bases. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure additional funding if required.

The Company maintains a portfolio of highly marketable and diverse assets that can be easily liquidated in the event of an unforeseen interruption of cash flow.

The liquidity position is assessed and managed under a variety of scenarios, giving due consideration to stress factors relating to both the market in general and specifically to the Company.

Analysis of financial liabilities by remaining contractual maturities

The table below summarises the maturity profile of the Company’s financial liabilities at 31 December 2015 based on contractual undiscounted repayment obligations. See note 28 for the expected maturities of these liabilities. Repayments which are subject to notice are treated as if notice were to be given immediately.

In thousand Armenian drams	As of December 31, 2015					
	Demand and less than 1 month	From 1 to 3 months	From 3 to 12 months	From 1 to 5 years	More than 5 years	Total
Financial liabilities						
Loans and borrowings	259,858	110,705	2,178,488	5,588,370	-	8,137,421
Other liabilities	46,013	-	-	-	-	46,013

Total undiscounted financial liabilities	293,487	531,087	893,703	6,635,816	-	8,354,093

29.4 Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Company’s involvement with financial instruments, including processes, personnel, technology and infrastructure, and from external factors other than credit, market and liquidity risks such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour.

The Company’s objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Company’s reputation with overall cost effectiveness.

The primary responsibility for the development and implementation of controls to address operational risk is assigned to the Board of Directors. This responsibility is supported by the development of overall standards for the management of operational risk in the following areas:

- requirements for appropriate segregation of duties, including the independent authorisation of transactions;
- requirements for the reconciliation and monitoring of transactions;
- compliance with regulatory and other legal requirements;
- documentation of controls and procedures;
- requirements for the periodic assessment of operational risks faced, and the adequacy of controls and procedures to address the risks identified;
- requirements for the reporting of operational losses and proposed remedial action;
- development of contingency plans;
- training and professional development;

- ethical and business standards;
- risk mitigation.

30 Capital adequacy

The Company maintains an actively managed capital base to cover risks inherent in the business. The Company’s capital is controlled by using rules and normative approved by the Central Bank of RA.

The primary objectives of the Company’s capital management are to ensure that the Company complies with externally imposed capital requirements and that the Company maintains strong credit ratings and healthy capital ratios in order to support its business.

The Company manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its activities.

Regulatory capital consists of Tier 1 capital, which comprises charter capital, general reserve, retained earnings including current year profit.

The Central Bank of Armenia has set the minimum value of the total normative capital amounting to AMD 150,000 thousand.
